Trần Đại Nhã

REACTJS DEVELOPER

INTRODUCE

As a STUer, I have learned some basic skills as well as the current popular technologies such as C++/C#, Java, PHP, Basic HTML-CSS-JS, MySQL.... and apply it into personal projects.

With me, just focusing on theory can't make myself better, I choose to learn by working on personal projects. I can tell you if I don't know how to answer your questions, but I know how to find the answer and I will find it.
